KRISTIAN REFORMIS
Software Developer (AI & Web) | Full-Stack Engineer | IT Support Specialist

Banjarmasin, Indonesia | HP: 085247037566 | Email: tianreformis@gmail.com |
GitHub: https://github.com/tianreformis | LinkedIn: https://linkedin.com/in/tianreformis

PROFESSIONAL SUMMARY

Full-stack Software Developer with 9+ years of experience building scalable web applications and AI-powered systems. Specialized in Next.js, Python, and Large Language Model (LLM) integration. Proven ability to deliver end-to-end solutions—from system design to deployment—while aligning technical implementation with business needs. Experienced in SaaS development, API integration, and IT infrastructure management in both freelance and educational environments.

TECHNICAL SKILLS

Programming & Frameworks:

- JavaScript (Next.js, React.js, Node.js, Express)
- Python (Pandas, Scikit-learn)
- PHP (Laravel)

Frontend Development:

- Next.js (App Router), React.js
- TypeScript, Tailwind CSS

Backend & API:

- RESTful API, JSON:API
- Authentication & API Integration

AI & Data:

- LLM Integration (OpenAI, Gemini)
- Prompt Engineering
- Retrieval-Augmented Generation (RAG)

Database & DevOps:

- PostgreSQL, MySQL, Supabase
- Git, GitHub
- Vercel, VPS, Shared Hosting

IT Support & Networking:

- Mikrotik Networking
- Server Management
- Hardware & Software Troubleshooting

PROFESSIONAL EXPERIENCE

Informatics Teacher & Head of Computer Lab

Kanaan Christian School, Banjarmasin, Indonesia
June 2022 – Present

- Designed and delivered curriculum in Computer Systems, Programming, and Networking aligned with AI and Industry 4.0 trends
- Developed AI-based learning modules using Python (Scikit-learn, TensorFlow/PyTorch)
- Built internal tools and automation bots using AI APIs to improve administrative efficiency
- Mentored students for programming competitions (city to national level)
- Managed school IT infrastructure including servers and networks

Full-Stack Developer (Freelance)

Remote | Project-Based
January 2017 – Present

- Built and deployed SaaS applications using Next.js, TypeScript, Tailwind CSS, and PostgreSQL
- Integrated AI APIs (OpenAI, Gemini, OpenRouter) for automation and productivity tools
- Managed full SDLC: requirement gathering, development, testing, and cloud deployment
- Migrated legacy systems (PHP/Delphi) into modern API-based architectures
- Configured and optimized operating systems across multiple devices

Computer Lab Assistant

STMIK Indonesia Banjarmasin
June 2019 – June 2021

- Taught programming fundamentals (C++, PHP, JavaScript)
- Provided technical support and mentoring to 500+ students

LAST PROJECTS

TianEduAI
AI-powered education platform to enhance interaction between teachers and digital resources

- Built using LLM integration and modern web stack
- Focused on research assistance and automated content generation

Leksika AI
SaaS platform for automated lesson plan generation

- Utilized advanced prompt engineering and LLM APIs
- Designed for educators in Indonesia

EDUCATION

Bachelor of Informatics Engineering (S.Kom)
STMIK Indonesia Banjarmasin
2017 – 2021 | GPA: 3.5 / 4.0

ADDITIONAL INFORMATION

- Open to remote opportunities (Worldwide)
- Strong problem-solving and system design skills
- Experience working independently and managing multiple projects
